E-safety overview – guidance

- The unit names refer to resources available at www.digital-literacy.org.uk
- Each unit contains many lesson ideas and resources. It is likely that only 2-3 lessons will be needed.
- E-safety (digital literacy) can be taught as part of PSHE and/or computing curriculum and can take the place of one of those lessons in the weekly timetable where needed.
- Planning needs to be shown on the termly planner.
- Units have been placed so that the whole school is working on similar units at the same time where possible. Units are not progressive within a year group and can be reordered if preferred.
